BS in Health Information Administration

Program Overview

The Health Information Administration (HIA) Program offers a four-year program that leads to a Bachelor of Science degree. Students following the program may prepare for employment in hospitals, clinics, health agencies, health information systems, medical research programs, or any other health-related organization. Graduates are eligible to write the National Certification Examination administered by the American Health Information Management Association. Upon successful completion of this examination, graduates receive the credential of Registered Health Information Administrator (RHIA). The program offers a flexible curriculum for individuals who have attained a Registered Health Information Technician status and who wish to pursue a higher level of education to that of a Registered Health Information Administrator. The Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM) accredits the Health Information Administration Program.

Program Mission and Vision

The mission of the Department of Health Information Administration is to prepare confident, competent, and contributing professionals, many of whom are underrepresented in the health care professions, to function in ever-changing health information management and technology systems. Graduates will be equipped, through engaging in lifelong learning and confidentiality training, to serve as advocates for patients' access in the process of obtaining health information and health information privacy. Our vision is to be recognized as a leader in health information and informatics education and to empower individuals to serve as leaders in the health information management profession.
